BEWL WATER FISHERY WEEKLY REPORT week ending: 04-Oct-18

At last an improvement in the fishing at Bewl Water. At the time of writing any method anglers are doing better than fly anglers. Several have reported catching 6 - 8 trout. Plenty of trout can be seen on or just below the surface, but are sometimes proving difficult to catch.
Rod average for the week, based on returns, is a much improved 2.59.

As the majority of boat anglers have been fishing in the Main Bowl and near to the dam, we have very little information about other areas. Any feed back would be greatly appreciated.
Bank fishing is still challenging. Best areas are Chingley, The Dam Wall and Bramble Point.
Suggested flies to try are Cormorants, Hoppers and Buzzers.

Winner of the prize draw for September is Vitalij Polechin who wins a free day motorboat.

Winter pike fishing will be available from 1 November to 31 January (weather permitting). Full details can be found on the Bewl Water website.

~~Water temperature 16degC~~ ~~Water level 68.9%~~
