

BEWL WATER FISHERY WEEKLY REPORT week ending:

14-Jun-18

The trout are still feeding on pin fry which always means challenging conditions, and, although fish remain high in the water they are proving evasive for some. Nevertheless there has been an improvement in the fishing and the catch average for the week, based on returns, is a very good 4.15 fish per rod. Levels remain almost full and the water quality is good and still very clear.

A further 1500 rainbows were stocked across the reservoir on Wednesday 13 June.

Best flies to try are Silver Invictas, Cormorants and Cat's Whiskers and the best areas have been The Main Bowl and Hook Straight. We have very little information from bank anglers but the best areas to try are Monty's seat, the front of the playground and Bramble Point.

Water temperature 18degC and level is 97%.

Top 25 Fish of the Week					Statistics from Returns
