

BEWL WATER FISHERY WEEKLY REPORT week ending:

20-Jul-18

The continuing hot, bright weather has meant another challenging week's fishing at Bewl.

Both fly and any method anglers have struggled since the weekend . Although plenty of trout have been seen chasing the fry just below the surface, most of the fish that have been caught have come from the deeper water. Rod average for the week based on returns is 2.

A further 2000 rainbows were stocked this week.

Best area if still the Main Bowl including the "bubble".

Bank fishing has proved difficult even from the banks in the deeper areas.

Best flies to try are buzzers and fry patterns.

With high water temperatures catch and release for fly fishing is still suspended until further notice.

Water temperature is 23degC . Water level is still very high at 89%.
