

Bewl Water fishing report 09.08.19

Total number of returns	17
Total rainbows from returns	60
Rod average from returns	3.52
Average fish weight	2lbs 2oz
Best fish	3lbs 2oz

Bewl Water Fishery Lamberhurst, Kent TN3 8JH Tel 01892 890352 fishing@bewlwater.co.uk www.bewlwater.co.uk	
Water level	82%
Water temperature	19.5c

Apologies for this late report, the conditions have been such that angling has been patchy for most and returns have not been submitted as we would like. It is in the angler's interest to report their experience, as this determines decision on stock management.

About 2,000 fish were delivered last week and one pairing found those fish feeding towards the surface on Friday and both achieved bag limits. The following day however, saw the fish back at 10 - 12 meters down. Favoured spots were '**Chingley Point**' back to the dam, and with a slight south westerly breeze, the drift was relatively easy to manage.

Any method anglers found plenty of fish around the towers on paste and small spoons. Spinners are not producing at the moment due to the depth. Spinners need constant pace and after casting, the trajectory of the spinner (Droppen or Mepps) sees it only effective for a very short period, as the target species will be all within the optimum depth. Spoons such as a **Toby** or a **Berti** may be controlled as they wobble slightly backwards when not retrieved.

Don't forget to sign up to our loyalty scheme next time you are in the lodge –

Hire 8 boats, - get one free!

We are relying on your catch returns to provide as accurate data as possible on the fishing conditions, don't forget that each month we will choose one return to win a free boat on a return visit, there are several ways to submit your return:

- By filling out your permit and posting it in the box by the lodge or passing it to one of the team.
- By emailing fishing@bewlwater.co.uk
- By filling out our online catch return form on www.bewlwater.co.uk/fishing.
- By giving us a call on 01892 890352.

We need your catch reports for a number of reasons,-

- – To evaluate stock control.
- – To provide best possible information and advice.
- – To note where fish are located.
