A most frustrating week that tested angling skills to their limits. A very warm week saw fish often reluctant to feed on conventional flies, and upon investigation, we have noted that billions of Roach have hatched, and it is very possible that the Trout have been gorging themselves on the fry. Minkys and Damsels have been responsible for some success, but sadly we have seen many recording 'nil points'

Lure anglers by comparison have seen moderate success. I'd attribute their catches through their choice of spinner/spoon falling through the water quicker than the wet fly?

Please note, we have three competitions this week and the fishery will be closed to boat users on Wednesday and Thursday, and also, the Lithuanian Lure competition on Saturday 8th of June is fully booked
