THE CAMPSITE

Bewl Water's campsite offers a place for relaxation in a beautiful natural setting. If you are looking for peace and quiet, a place to unwind and enjoy a tranquil break in a lakeside setting, camping at Bewl Water will have all your boxes ticked.

Spend your time at Bewl Water with like-minded people who enjoy the great outdoor experience where you can enjoy views across the reservoir. We have all shower and toilet facilities which include a washing up area with hot water and unlimited fresh drinking water.

Our pitches are set out in an open space with plenty of room for children to run around, quiet areas to doze in the summer sun and plenty of communal space.

FACILITIES

There are a total of 80 camping pitches on the Bewl Water site.

All campers will have 24-hour access to showers, toilets and washing-up facilities with numerous freshwater taps located around each camping field. General and recycling bins are located at the top of the camping car park. Phone charging and camp shop available.

The children have access to the play parks on our campsite, but children must be supervised by an adult at all times.

CAMPSITE RULES

All under 21s must be accompanied by a parent/guardian.

Bewl is a family campsite and will not accept group bookings.
No hen or stag groups.

LOG BURNERS

Please always take care when using log burning fires. All yurts are fitted with a carbon monoxide and smoke alarm. If the alarm sounds, leave your yurt and contact the camping office.

DO NOT burn anything other than logs and firelighters in the log burners. You are provided with a complimentary basket of logs and fire fighters

Additional bags of logs can be purchased from the camping reception cabin. Bags are charged at £5 per bag. The log burner does get very hot, please use the protective glove and tongs provided and always replace the fire guard around the burner.

HOW TO USE YOUR LOG BURNER

1. When lighting a fire, air is your friend. Every wood burner has air vents which should be opened completely before you start. They can then be adjusted once the fire has taken.
2. Build a small pyramid-shaped structure in the middle of the stove using a couple of firelighter, add some kindling then a couple of small logs. Make sure that there is space between the items so that air can get in to feed the fire as it gets going.
3. Light the firelighter with a match and then as the kindling takes hold partially close the door of the stove leaving a gap of about an inch to let in maximum air. You **MUST** not leave the room while the log burner door is open.
4. Once the kindling is burning strongly you can add two or three larger logs, being careful not to smother the fire.
5. You should now shut and secure the door of the wood burner. Once the logs are properly alight you can adjust the air vents to half open or less so that your wood burns for longer. You may need to open them again if the fire dies down, or when adding new logs.
6. Please do not leave the log burner unattended in your yurt.

Note - The log burner unit does get very hot, do not touch, always use the insulated leather gloves and tongs provided when opening the wood burner door.

The wood burner will slowly extinguish itself if all the vents are closed. Do not place anything on the wood burner or the fire guard to dry, including items of clothing, towels etc.

THE COUNTRYSIDE CODE AND ANCIENT WOODLAND

1. We all have a responsibility to protect the countryside now and for future generations, so make sure you don't harm animals, birds, plants or trees and try to leave no trace of your visit. When out with your dog make sure it is not a danger or nuisance to farm animals, horses, wildlife or other people.
2. Leave gates and property as you find them and follow paths unless wider access is available
3. Leave gates as you find them or follow instructions on signs.
4. Follow paths unless wider access is available, such as on open country or registered common land (known as 'open access land').
5. Leave machinery and farm animals alone
6. Use gates, stiles or gaps in field boundaries if you can - climbing over walls, hedges and fences can damage them and increase the risk of farm animals escaping.
7. Our heritage matters to all of us - be careful not to disturb ruins and historic sites.
8. Litter and leftover food doesn't just spoil the beauty of the countryside, it can be dangerous to wildlife and farm animals - so take your litter home with you. Dropping litter and dumping rubbish are criminal offences. Fires can be as devastating to wildlife and habitats as they are to people and property - so be careful with naked flames and cigarettes at any time of the year. If a fire appears to be unattended then report it by calling 999.
9. Keep dogs under effective control.

ENJOY A PAW-FECT DAY

When you take your dog into the outdoors, always ensure it does not disturb wildlife, farm animals, horses or other people by keeping it under effective control. This means that you:

- Keep your dog on a lead, or keep it in sight at all times, be aware of what it's doing and be confident it will return to you promptly on command.
- Ensure it does not stray off the path or area where you have a right of access. Special dog rules may apply in particular situations, so always look out for local signs - for example:
- Dogs may be banned from certain areas that people use, or there may be restrictions, byelaws or control orders limiting where they can go.
- The access rights that normally apply to open country and registered common land (known as 'open access' land) require dogs to be kept on a short lead between 1 March and 31 July, to help protect ground nesting birds, and all year round near farm animals.

ENJOY A PAW-FECT DAY

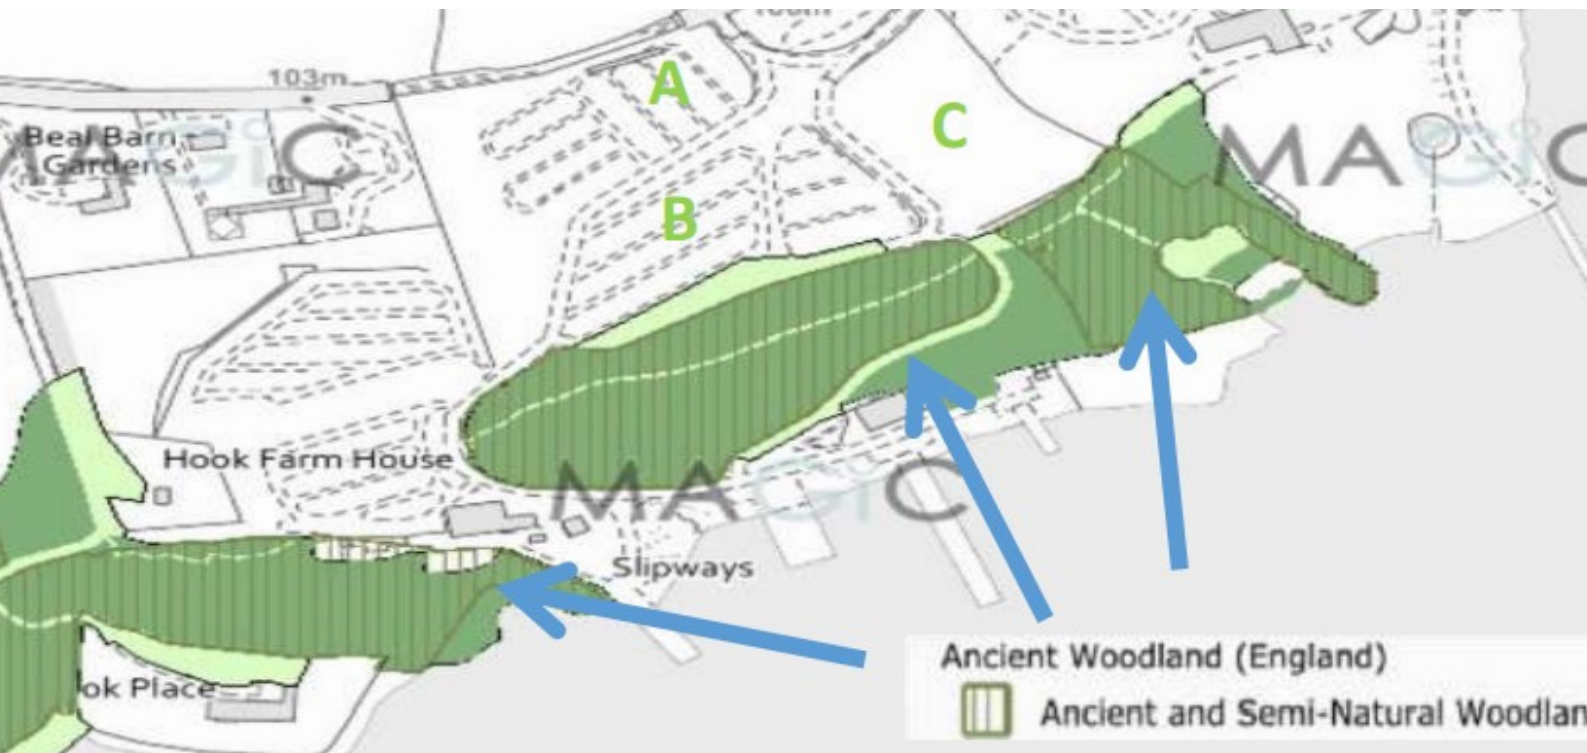

It is always good practice (and a legal requirement on 'open access' land) to keep your dog on a lead around farm animals and horses, for your own safety and for the welfare of the animals. A farmer may shoot a dog which is attacking or chasing farm animals without being liable to compensate the dog's owner.

However, if cattle or horses chase you and your dog, it is safer to let your dog off the lead - don't risk getting hurt by trying to protect it. Your dog will be much safer if you let it run away from a farm animal in these circumstances and so will you.

Everyone knows how unpleasant dog mess is and it can cause infections, so always clean up after your dog and get rid of the mess responsibly - 'bag it and bin it'. Make sure your dog is wormed regularly to protect it, other animals and people.

PRESERVING THE ANCIENT WOODLAND

The woodland surrounding the campsite is ancient woodland. It is an irreplaceable habitat and must be looked after. We ask therefore that guests stay on the paths and not deviate by going into the woodland itself.

To protect our Ancient Woodland and environment, the burning of wood is strictly prohibited, it is forbidden to break branches off trees and/or take wood from the surrounding areas and that this includes any trees or deadwood. Charcoal only BBQs are allowed, providing they are raised off the ground. BBQs must be extinguished by 10.00pm. Open fires, fire pits and rope swings are also prohibited. No structures can be tied or secured to trees or vegetation. Any structures that are or are deemed to be causing damage to the site will be taken down or removed. The Bewl Water site team reserve the right to do so without prior consent and wholly at the site teams' discretion.

WHY ARE ANCIENT WOODLANDS SO IMPORTANT?

Our ancient and native woodlands are one of our oldest land uses and most diverse ecosystems. They have taken hundreds if not thousands of years to develop, and in the case of ancient woodland, are irreplaceable.

For millennia they have been an essential source of timber, fuel, coppice and other sustainable products. They are a vitally important component of the English landscape and everyone has its own long and fascinating history.

Many are open for public access and are now used for a remarkably wide range of recreational activities, from dog walking and bird watching to more contemporary activities such as mountain biking and forest schools.

Without even being visited they can still enhance the quality of people's everyday lives, providing a permanent, natural and peaceful green element in busy local environments.

Finally, the importance of the more subtle but vital environmental services they provide, such as flood alleviation, clean water supplies and carbon sequestration, is now increasingly being recognised and valued.

In terms of the extent of the resource, the original Ancient Woodland inventory identified approximately 340,000 hectares of woodland in England is ancient. Nearly 200,000 hectares of this semi natural and 140,000 hectares is in plantations on Ancient Woodland sites.

Subsequent estimates suggest that there is around 210,000 hectares of native woodland which is not Ancient Woodland sites. So taken together these three categories of woodland comprise just over half of England's woodlands of c.500,000 hectares.
